## Curtain Restoration Quotation Request Form

Facility Name \_\_\_\_\_

Facility Address \_\_\_\_\_

Contact Name \_\_\_\_\_

Contact Title \_\_\_\_\_

Contact Telephone \_\_\_\_\_

Contact Fax \_\_\_\_\_

Contact Email \_\_\_\_\_

Transportation Requested  yes  no

Removal/Re-hang Requested  yes  no

Complete information for each item/type. Duplicate for additional items.

### Item 1 (name or description) \_\_\_\_\_

Number of identical pieces \_\_\_\_\_

(ex: traveler curtain is usually 2 – 1 left & 1 right )

height \_\_\_\_\_

# of fabric panels wide \_\_\_\_\_

width of single panel \_\_\_\_\_

Typically curtains are made of vertical panels sewn together. We find this the most reliable method for determining the width: 1) **Count the number of panels** in a single curtain and provide us with the approximate 2) **width of a single panel in inches**. This allows us to determine if the curtain was made from standard 54" wide fabric. This method of determining the width makes it unnecessary to determine the fullness and is easier than trying to measure the width of a hanging, pleated surface.

Fabric is  FR (Flame Retardant Treated)  IFR (Inherently Flame Retardant)  Unknown

Lining Curtain is  lined  unlined (lining is a 2nd fabric sewn onto the back side of curtain)

Curtain  can be lowered in to be removed from pipe  is dead-hung (can not be lowered)

### Item 2 (name or description) \_\_\_\_\_

Number of identical pieces \_\_\_\_\_

(ex: traveler curtain is usually 2 – 1 left & 1 right )

height \_\_\_\_\_

# of fabric panels wide \_\_\_\_\_

width of single panel \_\_\_\_\_

Lining Curtain is  lined  unlined (lining is a 2nd fabric sewn onto the back side of curtain)

Curtain  can be lowered in to be removed from pipe  is dead-hung (can not be lowered)

Limelight recommends the removal of all hooks and metal hangers before shipping drapery. Please call with any questions and to get an accurate estimate on the time involved for curtain restoration. Normal turnaround time is two to four weeks after receiving the curtains. Unforeseen circumstances may increase the time required for restoration.
