

What You Don't Know About Limelight Could Help You!

Limelight Productions of Lee, Massachusetts has a less-known side that meets the unique, but recurring needs and one-off challenges of a number of industries, businesses and services outside of the theatre realm.

Plumbers and HVAC installers may use one of our fog machines to safely test systems for leaks. **Fire Departments** may use the same fog machine for training purposes.

Trade shows, product unveilings, or even **fashion shows** may call on our “pipe and drape” services.

We have provided custom designed lighting solutions for **weddings** and **special events** in spaces ranging from atriums to tents.

Our inventory of specialized, **hard-to-find parts and supplies** includes “load rated” hardware - not generic unrated hardware typically found at your big box stores, and a wide range of replacement lamps/bulbs.

The list goes on. We may be able to help you with your challenges. Give us a call. Let's talk.
